

MARCAIDA

Liquid Seaweed Blend

Plant antioxidant inducer that prevents oxidative stress by activating the plant's defensive system. It improves the plant's resistance to adverse situations and optimizes its performance.

DECLARED CONTENT w/w

Alginate acid	1,5 %
Manitol	0,5 %

OTHER INFORMATION OF INTEREST

pH	6,2 (20°C)
Density	1,05 kg/L (20°C)

PACKAGING

✓ 1 L

INDICATIONS:

- ✓ Early application
- ✓ Avoid application on farms with a weak health status.

Fertilizer usable in organic plant production according to R(EU) 2018/848 in accordance with the UNE 142500 Standard.

PRODUCT BENEFITS AND ADVANTAGES

- It prepares the plant's immune system for a faster and more effective response to various types of stress.
- Retardant of cellular senescence: reactivates cell multiplication by generating new tissues.
- It facilitates a solid and robust growth of the vegetable.
- Higher harvest yield.
- Increases the quality of the performance.
- It accelerates root activity and promotes greater nutrient uptake, which contributes to the optimal development of the plant and its resistance to adverse conditions.

DOSAGE** AND METHOD OF APPLICATION

- ✓ Foliar application.
- ✓ Horticultural and red fruits (greenhouse and open field): 2 cc/L throughout the crop cycle.
- ✓ Citrus, stone and pome fruit trees: 1,50 cc/L from budding to fruit ripening.

****Note:** For optimal results, it is recommended to follow the application instructions and continuously monitor the crop conditions.

Compatibility:

Do not mix with acid reaction products, cupric, sulfur, or mineral oils; Compatible with most fertilizers and phytosanitary products. It is recommended to test the mixture before combining with other products in large quantities.

Handling and storage:

Store in a cool, dry place protected from sunlight and heat, with the container tightly closed. Wear personal protective equipment (gloves, mask and goggles) to avoid direct contact during application.
